

PEDESTRIAN BICYCLE CRASH TEST VIDEO

An eight-minute VHS video is now available for purchase to CATAIR Members and Non-CATAIR members. This video contains a series of eight crash tests involving Pedestrians and Bicyclists in the following configurations:

1. Ped Standing - Struck in Back
2. Ped Standing - Struck in Front
3. Ped Standing - Struck on Left Side
4. Ped/Bike - Struck in Back
5. Ped/Bike - Struck on Right Side
6. Ped Standing - Struck on Right side
7. Ped/Bike - Struck in Rear
8. Ped/Bike - Struck in Front

These crash tests show both real-time and slow-motion time segments. As a lead-in to each of the above tests, the crash data text is superimposed over video to describe the results. Further, music has been added for the viewer's enjoyment.

As AN ADDED BONUS, this video tape will also include additional crash testing video (music/text incl.) from other controlled testing sessions!

(NB: This video is copyrighted and further reproduction is discouraged.)
