

The Canadian Association of Technical Accident Investigators and Reconstructionists

Ontario Region

Utilizing Video Evidence in Crash Investigations

June 25, 2019

Toronto Police College,

Toronto, Ontario, Canada

iINPUT-ACE

www.input-ace.com

CATAIR (Ontario Region) announces this iINPUT-ACE one-day event at a cost of \$50.00 per person. This seminar will be held at the Toronto Police College located at 70 Birmingham Street, Toronto.

The iINPUT-ACE digital video analysis software is a powerful tool that allows investigators to access proprietary video formats, enhance, and manage video evidence. A built-in validation tool provides the investigator with a forensically sound end product for court reports and presentations.

This 8-hour training session provides a comprehensive technical overview of the software, and how video analysis can be integrated into traffic reconstruction investigations. iINPUT-ACE offers a full two-day user course at the Toronto Police College on 26 and 27 June.

Topics to be covered at the one-day training session include:

- How spatial and temporal compression affect the way video appears, and how it can affect the way untrained individuals interpret images
- How variable refresh rates affect the calculation of vehicle speeds, and how to avoid the common pitfalls of simply “counting frames” to get timing
- An introduction to HEX and macroblock analysis
- An overview of integrating video evidence into point cloud data via the new Photo Overlay Tool
